SPECIAL MONCRIEF

Pedigree Trees

One acre of ground planted to Moncrief Pedigree Trees produces more profit, with more certainty and less expense than triple acreage planted in corn, wheat or other small grains.

To prove that this statement is applicable to your vicinity we are going to sacrifice profit and make you an exceptional offer.

Moncrief orchards constantly bring astounding reports of heavy yields sold at big prices; Moncrief's Trees are bound to make good, for the natural laws of heredity is "like begets like" and Moncrief Parent Trees are chosen from a quality standard.

Early bearing, select color, large sized fruit, and abundant yields year after year are Moncrief requirements. These qualities manifest themselves without variation in Moncrief Propagated Trees.

Profits of \$5013.65 off of $4\frac{1}{2}$ acres, \$2650 from only 3 acres of peach trees, or \$21,000 returns from the crop of 1000 11-year-old trees are absolute bearing records from orchards of Moncrief trees.

These are the kind of trees we offer you on this special get-acquainted deal.

Saves 50 Per Cent

To advertise our better trees we have made up 43 fine collections which will be sold at these remarkable low prices. The trees are all in perfect dormant condition, carefully packed and guaranteed to reach you in good condition.

These selections will not last long. Remember the prices are special and cannot be continued indefinitely. It is for advertising purposes that we make this unprecedented offer. We do not expect to repeat it.

If you cannot take a whole box get some neighbors to club in with you. At these prices no boxes will be broken. Order by box number. Wire your order at our expense; we will reserve and hold for shipping instructions. Safe delivery guaranteed.
